

DURBAN CHAMBER OF COMMERCE & INDUSTRY

GHS Introductory Course

RPMASA in partnership with UNITAR

GHS

Globally Harmonized System
of Classification and Labeling

 **CLICK TO BOOK**
WEDNESDAY, 25 SEPTEMBER

Invites you to participate in a one day introduction course to the GHS

The GHS is developing fast both nationally and internationally, as a new regulatory means of communicating hazards in industry and for the consumer.

The Department of Environmental Affairs has just published the Waste Classification Management Regulations for immediate implementation, which requires using the GHS.

What does it mean to YOU and to YOUR Business?

Facilitated by Liz Anderson -

of the Responsible Packaging Management Association of Southern Africa (RPMASA) who participates in the UN Committee of experts for the GHS, and the United Nations Industrial Training & Research (UNITAR), programme advisory group.

This one day Course, using RPMASA introduction and UNITAR training material will demystify the confusion surrounding implementation of the GHS both in South Africa, and internationally.

Key questions to be addressed:

- What is its purpose?

- Who does it impact on?
- Is it best practice or a legal requirement?
- What sectors does it impact on?
- Is it for industry and/or retail?
- What impact does it have on transport placards & labelling?
- How does it differ from transport classification & how do I start GHS classification?
- South African and SADC position

About the facilitator:

Liz Anderson has over 30 years industry experience in, chemical, food, beverage, agriculture, pharmaceutical, plastics, packaging and supply chain. She now consults on environmental and dangerous goods issues including impact assessments, applications for authorisation, audits, risk assessments, training, GHS and related issues.

Liz leads the RPMASA, which she represents at the UN committee of experts for transport of dangerous goods and the GHS, and works closely with national department of environment, labour, transport, health and agriculture for new legislation and regulations, including the national waste strategy advisory and the national chemicals management coordinating committee.

Liz has organised, Chaired and presented at various Conferences - National and International, as well as run Workshops and Training on topics such as Chemical Process Safety Management, Chemical Awareness and Emergency response, Cleaner Production and Sustainability, Packaging and Transport Compliance, Environmental, Waste and Dangerous Goods Legislation and the GHS.
